

FOR IMMEDIATE RELEASE:

Headline: Public Water Supply District #3 of Taney County Nominated as Drinking Water

System of the Year!

From Missouri Rural Water Association, Ashland, Missouri – January 27, 2023 – Public Water Supply District #3 of Taney County Missouri has been nominated for the Missouri Rural Water Association’s Water System of the Year Award!

Criteria include overall operations, financial responsibility, managerial effectiveness, regulatory compliance, and participation within the industry.

Each year, the Missouri Rural Water Association (MRWA) nominates at least three finalists for this award. Nominees are chosen by the Association’s staff after reviewing submissions both from within MRWA and from water utilities.

Finalists are visited by MRWA staff members and evaluated using a 100-point questionnaire.

The honor alternates between two classes of water systems, with municipalities judged one year and water districts the next.

The final award recipient will be announced at the MRWA Annual Technical Conference and Trade Show during the spring.

MRWA Executive Director Howard Baker says, “It’s an honor to be nominated. Nomination means that the system has already demonstrated excellence in its operations. The award will be given to the one system that has that extra edge over the others.”

The MRWA is a non-profit organization providing on-site technical assistance, training, and regulatory and legislative representation for rural public drinking water systems.
